

SKULL & CROSSBONE NECKLACE

1.) Using the Cattlebug & the skull & crossbones cattlebug die I cut the shapes out of a clear plastic purchased @ the hobby store and out of window screening.

For the Clear Plastic Piece:

I also ran it through the skull embossing folder to give extra texture.

For the eyes I added pink Flocking.

For one of the window screen skulls I used embroidery Floss in hot pink to stitch around the edge. Then I applied a liquid stiffener over top of the whole thing.

For the other window screen skull I coated it with a hot pink acrylic paint and allowed some of the holes to fill in.

2.) In all shapes I punched holes at the top.

3.) For the chain i found a hot pink plummer's chain.

4.) In between each skull & cross-bones shape I tied a thin, gauzy fabric to make knots of sorts.

This seperates each skull out so you can clearly view each one.

Now enjoy!

xoxo
